

Steltronic Bowler Console Installation and Footprint Dimensions

The Steltronic pedestal (as shown above) will be mounted behind your ball return system, and the dimensions shown below are for the base plate of this pedestal. The mounting holes (drilled by our installers) will be 6-1/4" apart from each other.

If you prefer to have a custom made (larger) base plate to cover the existing holes from your previous scoring system (if applicable), please contact US Steltronic for a quotation and lead time to build these custom pedestals.

Normal lead time is about 3 weeks for a custom manufactured pedestal base.
